

DELIVERING CONFIDENCE FOR 30+ YEARS IN VERTICAL ACCESS SOLUTIONS

As today's distinctive building architecture pushes design boundaries, Standard Access provides the expert stewardship needed to deliver safe, efficient and effective outcomes, from beginning to end.

- ▷ Servicing Australia and south east Asia for more than 30 years
- ▷ Temporary hire and sales
- ▷ Global supply chain partnerships with leading OEM manufacturers
- ▷ Top-down/bottom-up solutions to meet almost every project requirement
- ▷ In-house engineers and custom fabricators
- ▷ State of the art service and testing facility
- ▷ Highly accredited trainers
- ▷ Specialists in addressing complex vertical access requirements such as detailed facade profiling and overhangs

SWING STAGES SUSPENDED ACCESS

Perfect for top-down applications where facade fixing is not an option or ground access is unsuitable. Commonly used for facade remediation and where 360° access is required.

MAST CLIMBER WORK PLATFORMS

Operable at heights up to 200 meters and loads up to 10,000kg, mast climbers are the ideal solution for safe and efficient access to expansive facades, and can be integrated with monorails.

MONORAIL SYSTEMS

Fixed directly to a building facade or integrated with a mast climber, monorails are integral where heavy elements require hoisting into place such as glass panels/curtain walls, cladding and signage.

HOISTS

Safely and effortlessly transport personnel and materials to any height with frequency control and stop/start comfort. Full operator induction. Customise with various door sizes and locations, manual or automated opening.
